Education

Universität des Saarlandes — **Saarbrücken, Germany**
M.Sc. Computer Science — *Oct 2019 – Aug 2025*

- DAAD (Deutscher Akademischer Austauschdienst) Graduate Scholarship
- Thesis**:** "*Beyond Heatmaps: A Visual Concept-Based Explainable Model via Graph Attention Networks*" — Seminar grade: 1.0

Baku Engineering University — **Baku, Azerbaijan**
B.Eng. Computer Engineering — *Sep 2014 – Jun 2019*

- Graduated with Honors | Government Scholarship for Academic Excellence

Selected Work Experience

Research Assistant & Thesis Student — **Saarbrücken, Germany**
DFKI GmbH (German Research Center for AI) — *Mar 2023 – Aug 2025*

- Developed an unsupervised **explainable AI model** with Graph Attention Networks (PyTorch) for **skin cancer diagnosis**, achieving **~3%** higher accuracy than baseline models built on foundation model embeddings (e.g., CLIP) while providing clinical **interpretability** through concept-based explanations.
- Delivered a **full pipeline** with dashboards, enabling clinician-ready **interpretability tools** for dermatological image classification.

Research Assistant — **Saarbrücken, Germany**
DFKI GmbH (German Research Center for AI) — *Nov 2021 – Sep 2022*

- Built and deployed **end-to-end ML solutions** (TensorFlow, pytest, Docker, AWS) for **risk detection** in manufacturing lines at Schott AG, improving accident localization accuracy with **post-hoc explainable AI** methods by **13%**.
- Fine-tuned LLMs (e.g., T5, BART) to generate incident reports from telemetry sensor data to assist early incident assessment.

Research Assistant — **[remote]**
TESLAB, NTU Singapore — *Feb 2021 – May 2022*

- Built **multimodal-to-image translation** pipeline with Generative AI models for topology optimisation of 2D/3D structures, achieving **91–99%** accuracy, enabling near real-time optimisation.
- Deployed **a full pipeline** (Docker, Flask, FastAPI) to replace heavy simulation models.

Machine Learning Intern — **Baku, Azerbaijan**
ATL Tech — *Jan 2019 – Jun 2019*

- Contributed to the development of a **speech recognition system** (TensorFlow, SciPy) for aviation training simulation.
- Performed **feature engineering** and preprocessing of unstructured audio data (e.g., spectrograms, MFCCs), training LSTM and Hidden Markov Models on cockpit command samples.

Sumer Internship — **Ankara, Turkey**
ImageLab, Middle East Technical University — *Jun 2018 – Sep 2018*

- Built a ML pipeline for ball-position estimation in football, to assist tracking camera accuracy during occlusion. Implemented end-to-end data preparation and feature engineering.

Skills

- **Machine Learning & AI:** VAEs, GANs, GNNs, CNNs, ViTs, VLTs, LLMs
- **Programming & Data:** Python (PyTorch, TensorFlow, Hugging Face, OpenCV), C++, R, SQL, Spark
- **MLOps & Tools:** MLflow, Docker, CI/CD, FastAPI, Flask, AWS, Airflow
- **Languages:** Azerbaijani (native), English (C1), Turkish (C1), German (B1)

Selected Publications

Unsupervised multi-sensor anomaly localization with explainable AI. Ameli, M., Pfanschilling, V., Amirli, A., Maaß, W., Kersting, K. Artificial Intelligence Applications and Innovations. Springer, 2022. DOI: 10.1007/978-3-031-08333-4_41
